4th Reading Response Paper: Parts II and III of Selfe's *Technology and Literacy in the 21st Century*

**Due Dates:** Draft on Part II due Monday, September 26th  
Completed version (on Parts II and III) due Friday, September 28th

**Format:** MS Word Document or Webpage  
**Submission:** Please email your paper to me as an attachment or send me a link to your project

**Length:** Equivalent of one-to-two pages of typed text. Note that this response need not be in the format of a "standard paper." Think of composing a text that will work online.

Much like the previous response paper, I am looking for you to offer a detailed descriptive account of the second and third parts of Selfe's book. Though you certainly do not need to include all of the details from her text, be selective in mentioning the key points and ideas that you think describe what she is writing about.

In concluding your response, I would like you to respond to the question: Do Selfe's final two chapters follow logically from the previous chapters? Did you predict her to conclude her book in the ways that she does? Could you imagine another logical set of conclusions?

**Please note:** this assignment is due in two drafts. The first draft should cover Part II; the completed draft should include the discussion of Part II and Part III.

This reading response text will be combined with the one before it to create a comprehensive discussion of Selfe's book on your final website.
